FUNGISOL

Organic contact cum systemic plant protectant for control of broad spectrum fungus

Fungisol, contains extracts of secondary metabolite produced by aerobic fermentation of specific microorganisms. The microbe produces bioactive β amino fatty acid compounds. It is fortified with phenolic compounds and antioxidants. Fungisol works with a unique mode of action of boosting plant resistance and immunity to pathogenic fungi.

Advantages

- FUNGISOL helps plants to revive faster from disease stress.
- Effective against pathogens that developed resistance to chemical fungicides.
- Its prophylactic and curative properties give excellent and longer control.
- It is safer to environment, does not allow cross resistance and safer to operators.
- It does not leave any toxins, so the harvest can be made without any waiting time.

- Dosage** : 2 mL/L of Water
- Application Method** : Foliar spray (Early morning / Late evening)
- Crops** : All crop
